

A DOE Service-Disabled Veteran-Owned Small Business of the Year

As an established and accomplished energy solutions company, **BNL Technical Services, LLC** provides its clients with the support necessary to ensure efficient project execution.

Commit

The beginning of any energy project is for all parties to commit to making the decisions based on empirical data and compliance with mandated policies. In light of that data and those policies, the stakeholders can then integrate the non-empirical elements of philosophy and culture.

Understand

The key to a successful energy project is for all stakeholders to understand the technical and analytical elements of the data, equipment options, incentive programs and mandated benchmarks. Due to the complexity of correlating these, at times divergent inputs, it is essential to have a project partner that can decipher and interpolate all of the information to ensure that the project outcome is optimized.

Plan

BNL Tech develops every project plan with a tailored approach to the specific goals and requirements of each client. Energy projects are not one-size-fits-all undertakings. In order to optimize the quantitative and qualitative outcomes, we design each solution from the ground up.

Implement

Efficient project execution is BNL Tech's hallmark. By embracing a dynamic capability approach, each energy solution is implemented in the most direct and efficient manner. Even when obstacles are encountered, BNL Tech's adaptive mindset ensures client confidence and satisfaction.

Verify

Verifiable outcomes are the litmus test of any project. Therefore, our monitoring, reporting and verification (MRV) solutions are integrated into the lifecycle plan for every project. These solutions are customized to the specific level of granularity required by each client.

SOLUTIONS

BNL Technical Services, LLC has a reputation built on delivering consistent, quality service to clients. The firm offers a comprehensive range of energy efficiency solutions. BNL Tech has earned a reputation for technical excellence, superior service, and critical on-time, on-budget delivery.

Energy Efficiency

Photovoltaics

Electric Vehicle Infrastructure

LED Lighting

Backup Power & Storage

Energy Auditing

All of BNL Tech's services are delivered as custom tailored solutions, and the support that we provide for your energy project will match your project needs and your budget.

Dunn & Bradstreet (DUNS): No. 06-944-1850

System for Award Management: (SAM) CAGE Code 1XL52

Principal NAICS, SIC and PSC Codes; NAICS: 236220, 237130, 238140, 238190, 238210, 238290, 238320, 238330, 238350, 238390, 238910, 238990, 488490, 541211, 541219, 541330, 541340, 541350, 541370, 541420, 541511, 541512, 541611, 541612, 541614, 541618, 541620, 541690, 541712, 541990, 561110, 561210, 561311, 561312, 561320, 561612, 561621, 561720, 561730, 561790, 562910, and SIC: 8731, 8711 and PSC: H142, K095, B528, R425, R405

Security & Quality:

- Facility Security Clearance Code 8958
- Current favorable FOCI Determination
- NQA-1 compliant Quality Assurance Program
- Federal Drug-Free Workplace and compliant Substance Abuse Policy with standard Background and Drug Screening/Testing
- Insurance coverage meets Federal service contracting requirements
